DRCC WORKSHOP

“Brain Injury -  
Behavior  
or  
Symptoms”

Presented by Zach Tubbs  
Education & Community Outreach  
Specialist, Minnesota Brain  
Injury Alliance

June 28, 2018

# BEHAVIOR or SYMPTOMS

## OBJECTIVES FOR THE DAY:

- \* Explore neuroanatomical features of brain and common symptoms after injury
- \* Offer guidance on best practice in working with brain injury survivors
- \* Provide tools to help navigate life after brain injury

Traumatic brain injury is not just an event, similar to a broken bone that heals over time. Traumatic brain injury affects personal, emotional and physical needs that go beyond the diagnosis of brain injury. This workshop will focus on supporting clients as they continue their life after injury, expanding the knowledge base of what symptoms of brain injuries are, and how important small details can be for clients that we serve.

## ABOUT THE PRESENTER:

**Zach Tubbs, Education and Community Outreach Specialist, Minnesota Brain Injury Alliance.**

Zach provides educational seminars throughout the state to professionals and families. Prior to working in the ECO department he was a case manager for the BIA along with other social service agencies. Zach has previously worked in group homes, working with clients with developmental disabilities and mental illness. He is a Licensed Social Worker and Certified Brain Injury Specialist.
